# How to Update the Background Color of Your Website

Go into the style.css file located under the src folder:

Change the numbers/letters after the "#" for background-color (the numbers corresponding to different colors can be found under the color index on the last page)

Alternatively, you can just click the box beside the numbers/letters and click on whatever color you want your background to be.

Click this black box

Color Index: THE HEX CODE RGB COLUMN IS THE IMPORTANT ONE

Color Name	Hex Code RGB	Decimal Code RGB
Maroon	800000	128,0,0
